SACILE - CANSIGLIO

The ascent to Cansiglio from Sacile is one of the classic Sunday excursions for MTB, E-Bike and road bike riders. You'll never be alone on the road, even on the most unlikely of days for cycling!

It is a steady, shady climb, not very long, with few climbs. The road is not particularly busy, even during tourist periods and at weekends, it is not very wide and there are several bends and hairpins; be careful, especially downhill!

Itinerary

We set off from Sacile, warming up our muscles on the plain as far as Caneva. Following the tourist signs for Cansiglio, we start to climb and reach the crossroads for Castello di Caneva (Caneva Castle, reachable with a 700-metre climb). A short flat stretch with a view of the well-known calcium carbonate quarries is the prelude to the start of the 11 km ascent at 8% that leads us to the finish. At first, we ride through mixed woodland and sloping meadows, with wide views, especially on the descent, then through beech forests. Once we reach La Crosetta Pass, the road levels out: after a few kilometres of gentle descent, we will arrive in the wide and panoramic Pian del Cansiglio, with its pastures, woods, farmhouses and Cimbri villages. If you are on an MTB or E-MTB, you have a wide choice of routes through the famous Forest, also to return to Sacile along alternative roads.

Characteristics of the route

Total length: 27 km

Total climb: 1,150 m.

Difficulty: challenging

Usable bicycle types: MTB, RDB, E-Bike

Paved road: 27 km

Unpaved road: 0 km

Fountains along the road: no

Camper parking areas: La Crosetta and Pian del Cansiglio

Bicycle services: in Sacile

Train+bike stations: in Sacile
